

# AFPC Academic Electronic Health Record

A bilingual electronic chart that simulates hospital and primary care settings.

Enhance medical, nursing, pharmacy and other healthcare students' clinical, documentation and interprofessional collaboration skills by converting your "paper-based" cases to e-charts. Learners can explore realistic aspects of care including medical histories, vitals, consults, labs, medications, etc. A suite of tools allow instructors to quickly create assignments, manage cases, evaluate students and explore pedagogical innovations.

- Patient profile
- Patient chart
  - Visit details
  - Progress notes
  - Vital signs
  - Lab viewer
  - Fluid balance
  - Assessments
    - Neurological
    - Respiratory
    - Cardiovascular
    - Gastrointestinal
    - Genitourinary
    - Musculoskeletal
    - Pain
    - Biopsychosocial
    - Integumentary
- Non-medication orders
  - Orders
  - Referrals to other disciplines
  - Lab orders/requisitions
- Medication orders
- Medication administration records
- Interprofessional care plan
- Discharge summary
- Billing
- Reports and documents
- Messaging
- External resources
